

KD Work Table

Mobile KoolDuct Fabrication

www.GoMech.com

The Mobile Work Station for Kingspan KoolDuct

Built to have the same quality and durability as the GoMech KD3Z and KD400, comes the new KD Work Table. Comprised of 6000 series aluminum alloy, the KD Work Table will be one of the most solid pieces of equipment you own. This sturdy fabrication space fits easily in today's modern KoolDuct shop.

Space is not a problem with this table ability to easily move around the floor on its 8 inch durable wheels. These wheels also lock when you need it to stay in place. The table top work area is 157 3/4 inches long and 47 1/4 inches wide; the perfect size for Kingspan KoolDuct.

The KD Work Table fits great with a GoMech equipped KoolDuct shop

- 9-ply Baltic Birch Table Top
- Uses the same high quality frame material as the KD3Z for extra durability
- 8 inch locking wheel with cast iron center. *(Leveling feet option also available)*
- Table width is perfect for the Kingspan KoolDuct Manual Bending tool.

The Perfect Fabrication Surface for Kingspan KoolDuct

The Rigid, High Quality KD Work Table Frame.

Locking wheels for easy transport in your work area

The KD Work Table is delivered to your shop in two pieces with minor assembly required. For more information on Gomech's line of Fabrication Products, visit www.gomech.com
